Simplify-Rewriting-Evaluation (SRE) Practice Worksheet B
AP Precalculus Unit 4 **Name**_____

Complete the problems in "Required:" column. At the completion of each section evaluate your level of competency. If you need additional practice choose problems from the "more practice". If you are staring at the problem with no clue where to start, then 1) refer to your list of identities (and work on memorizing them) and/or 2) watch the indicated video on Canvas. Also 3) ask your teacher questions during class and 4) come in before/after school or during IF to work and ask questions.

On your paper, write the Page Number AND the Problem Number. Incorrectly formatted and/or numbered submissions will be returned to you to complete again until they are submitted in the proper format.
